RE: Second Notice of Supplemental Educational Services

Dear Parent or Guardian:

Your child is enrolled in a school that has not made Adequate Yearly Progress (AYP) for three or more consecutive years. Because of this, the District must make available additional help for eligible students upon parent request. This additional academic help or tutoring is called "supplemental educational services".

Your child may be eligible for supplemental services. These services will be provided before or after school at no cost to you. The organizations that provide this extra help are called "providers". Attached is a list of providers that have been approved by the state.

If the District is not able to provide extra help for everyone who requests it, a fair and equitable process will be used to make sure that students in greatest need for low-income families receives it first. Participation in a supplemental program is kept confidential.

We encourage you to contact us as soon as possible if you have any questions regarding this notice or your child's eligibility to participate. You may call Barney Lacock at 856-9333 ext. 187.

Sincerely,

A handwritten signature in cursive script that reads "Barney Lacock".

Barney Lacock
Director of Instruction
